Forex reserves dip by \$2.94 bn

PTI
Mumbai

After rising for the past few weeks, the country's foreign exchange reserves declined by USD 2.939 billion to USD 535.252 billion for the week ended August 14, RBI data showed on Friday.

In the previous week ended August 7, the reserves had increased by USD 3.623 billion to reach a record high of USD 538.191 billion.

The foreign exchange kitty had crossed the half-a-trillion mark for the first time in the week ended June 5, 2020, after it had swelled by USD 8.223 billion to stand at USD 501.703 billion.

In the week ended August 14, the reserves declined due to a fall in foreign currency assets (FCA), a major component of the overall reserves.

FCA dropped by USD 743 million to USD 491.550 billion in the reporting week, the central bank data showed.

Exports from India growing in economies with controlled pandemic

IANAS
New Delhi

India's exports growth appears to be inversely related to the rise in Covid-19 cases in the export destinations, Crisil Research said in a statement on Friday.

"Put in another way, exports are flowing back to economies that have checked the affliction," the statement said.

"That explains why exports to certain economies are looking up while overall exports per se are still declining, though at a slower pace."

The country's exports as well as imports have consistently declined since

March 2020, ever since the pandemic disrupted business activity and global trade along with domestic demand.

"But the pace of decline is slowing, especially for exports. From a trough of (-) 60.2 per cent on-year in April it turned to (-) 10.2 per cent in July," the statement said.

"The reason is a sharp rise in exports to economies which have been able to control the pandemic. Latest country-wise data for June shows high growth in India's exports to China (78 per cent on-year) and other east Asian economies (constituting 16 per cent of our export basket). These include

Malaysia (76 per cent), Vietnam (43 per cent) and Singapore (37 per cent). Most of these economies had flattened the Covid-19 caseload curve in this period."

In contrast, the note pointed out that exports declined to western economies such as the United States, Brazil and United Kingdom, which saw a much higher caseload and were struggling to control it.

"Export prospects for this fiscal will pivot on the trajectory of the pandemic across countries. It will rise to countries that have controlled their caseload and restarted activity," the statement said.
